

BEAUFORT 60

The new Beaufort 60 (B60) is a prestigious and stylish, high quality horse trailer from England's premier trailer manufacturer. It is derived from the very popular Rice Beaufort Double and is in direct response to the general public's demand for an extra large two horse trailer suitable for transporting horses weighing in excess of 700kg and standing 16.3hh and higher. Modern large horses of the Hannoverian, Trakehner and large Dutch breeds are frequently uncomfortable in a standard trailer, which is only 5'6" wide inside at the most. This trailer enables the larger breed of horse to stand with it's rear legs as far apart as possible, thus giving the horse confidence and security and increasing the trailer's safety and stability. Also featured as standard on this distinguished trailer are our stylised rubber ramp facings (including Rice logo), twin ramp assisters on rear ramp, large side windows and side vents.
