

BEAUFORT DOUBLE

The Beaufort Double embodies all the qualities of engineering and design innovation for which Rice are internationally famous. This is evident in the very high specification that is fitted as standard. A double contoured timber floor, luxury full length side pads, fully padded swivel type partition (including padded breast/breech bars) all combine to provide a reassuring environment for your horse and make each journey stress-free. Its increased chassis and axle strength (from the Europa) make it capable of transporting 2 large horses with ease (gross capacity 2600kg). There is also an option available to increase the standard headroom from 7'0" to 7'6" if desired.
