'SUPREME RANGE'

SUPREME ROSETTE

	Internal Width	Internal Length	Headroom	Gross Capacity	Unladen Weight
Supreme Rosette	5'2" (1574mm)	10'1" (3073mm)	7'0" (2133mm)	1750kg	750kg 820kg*

*fully equipped with partition and spare wheel

The brand new Supreme Rosette is the most recent addition to the acclaimed Supreme Range. It is a modern, lightweight trailer and has naturally evolved from the enormously popular 'Rosette' trailer, although it now offers a higher specification as standard. This includes a fully galvanised chassis and framework, GRP nose cone, plastisol roof sheets and strong, pre-coloured resin coated side panels. There is also a stylish weather-flap fitted above the rear ramp as standard. The use of these modern building materials combined with a rubber overlaid floor and ramp facings, achieve a design criteria of a lightweight trailer able to be towed by the family car with low maintenance durability.
